

Dear Hiring Manager

Date: 16 October 2021

Your organization is currently looking for a **Flutter Developer** and it is a pleasure to come forward as a candidate for this position. You surely have multiple candidates to consider, and I feel obligated to honor the importance of this search by providing additional information about my professional personality and my unique background that may help you build a more comprehensive understanding of me as a potential candidate. There are several skills that are needed to do this position. I have acquired many of these skills with 4 years of experience in Mobile apps development & also have 1 Year 8 months hands-on experience on flutter.

Those that know my professional style would consider me a successful leader who fosters a culture of **confidence, coaching, competence, and teamwork**. From my resume, you'll see a person who is capable of working with a variety of technology. One of the most **challenging** (and **successful**) initiatives of which I've been a part to date was working in **"Duronto Browser"** the first Bangla browser in the history of Bangladesh. We can compare it as a competitor of the **"Google Chrome"** app. We even implemented some native features to our Browser by converting android native feature into dart package. This program was challenging from a technical standpoint and even more challenging from an interpersonal standpoint. Also I've been a part to date was working in **"Game On"** the best Sports app for Banglalink. We even implement more features than any other sports app in the market including **Live Match Video Streaming, Scores, News**, and many more. One more project what represents me as an Ideal candidate is **vDoc**. We implemented audio/video call using WebRTC. The most unique characteristic that my present organization values me most that, that **I can adopt new technology according to the need of the company and provide their desire output**.

I understand how important it is to find a person who can contribute to this role. It's also important that find someone who will be a collaborative, innovative, driven, and proactive member of the organization and that is certainly how others would characterize me.

I hope that you have found this letter useful as you consider your pool of applicants and also sincerely hope that we'll be allowed to communicate further about this opportunity.

Sincerely

Md. Shaheduzzaman
